Methodological Notes

Disclosure by Tillotts Pharma of payments to Swiss healthcare professionals and healthcare organisations in 2016

The Code of conduct of the pharmaceutical industry in Switzerland on cooperation with healthcare professional circles and patient organizations (Pharma Cooperation Code) mandates the public disclosure in 2017 of certain transfers of value made during 2016 to Swiss healthcare professionals and healthcare organisations. The disclosure data will be published on the website of Tillotts Pharma, www.tillotts.com. The disclosure requirements are set forth in Section 2 of the Pharma Cooperation Code.

The methodological notes below explain the data Tillotts Pharma have disclosed and how the data have been prepared, to assist the reader's understanding. Inclusion of these methodological notes alongside the disclosure data is mandated by Articles 281 – 282 of the Pharma Cooperation Code.

VAT

VAT is excluded from all disclosures of transfer of value.

Currency

All disclosures are made in Swiss Francs (CHF). Where the original payment was made in Euros, the sum was converted to Swiss Francs at the 2016 average annual exchange rate published by the European Central Bank.

Consolidated Disclosures of the Corporate Group and Cross-border Payments

The disclosures represent the consolidated transfers of value made by the Tillotts Pharma corporate group in line with the EFPIA Disclosure Code's dictate that separate entities belonging to the same multinational company (which could be the parent company and subsidiary company) shall be deemed to constitute a single company. In 2016, all transfers of value represent payments made by Tillotts Pharma AG.

Multi-year contracts

As a general rule, where multi-year contracts are included in the disclosure of transfer of value made by Tillotts Pharma in 2016, the disclosures related to these multi-year contracts represent the services rendered and paid for in 2016, and/or any expenses incurred and paid for in 2016, in each case under such contracts.

As a variance from this general rule, there is one instance where a fee for service is disclosed because the corresponding invoice was received and paid in 2016; however, the underlying service was rendered in 2015.

As a second variance from this general rule, in one instance, expenses are disclosed as they were incurred and paid for in 2016, but the related service was not delivered, nor the fee for service paid, until 2017. As such fee for service was paid in 2017, it will be disclosed as part of the next reporting cycle in 2018.

Data included

The data disclosed by Tillotts Pharma is consistent with the requirements of the Pharma Cooperation Code. The data can be categorised as follows:

Donations and Grants to Healthcare Organisations

Data disclosed under “Donations and Grants to HCOs” includes the payment of membership fees to healthcare organisations.

Payment of consultants who provide services to Tillotts Pharma

Disclosed data includes the payment of honoraria to Swiss healthcare professionals who provided services to Tillotts Pharma during 2016 (other than the one exception set forth above under “Multi-year contracts”). Where applicable, the disclosure data also includes payment of reasonable expenses to such consultants incurred in the delivery of their services, such as travel expenses and/or accommodation expenses. Where permission to disclose transfers of value on an individual basis was not obtained from an individual health professional, the transfers of value made to such healthcare professional are disclosed in an aggregated fashion.

Research & Development

Transfers of value representing financial support for research and development (including the planning and performance of non-clinical studies (subject to the *OECD Principles on Good Laboratory Practice*)), as well as costs that are subsidiary to these activities, are disclosed in an aggregated fashion.
